PROFILE

Dynamic professional with expertise in full-stack development, UI designing, and prototyping. Experienced in creating responsive websites, management systems, and custom applications from concept to deployment. Adept at combining design thinking with technical execution to deliver user-friendly and efficient solutions. Recognized for adaptability, attention to detail, and effective coordination in both development and operational tasks.

EDUCATION

HND in Computing (Software Engineering)   2022 - 2024
BTECH Level 5 | ESOFT Metro Campus

Diploma in Information Technology   2021
Royal International Collage

WORK EXPERIENCE

AITCO | Saudi Arabia   MAY 2025 - PRESENT
Document Control Assistant

- Maintaining documents and records for the team, working with Word and Excel to organize and track information efficiently.

Zolatik (Pvt) Ltd. | Sri Lanka(WFH)   April 2025 - Sept 2025
Software Engineer (Intern)

- Worked as a full-stack developer, building Angular (TypeScript) front-end and .NET API back-end with SQL Server database, collaborating with team members via GitHub.

Global Strategic Solution (Pvt) Ltd. | Sri Lanka   Feb 2024 - Dec 2024
Junior Software Developer (Intern)

- Developed desktop POS systems using C# .NET and SQL Server, and built responsive websites using HTML, CSS, JavaScript, and Bootstrap.
- Collaborated with team members to design and implement application features following SDLC best practices

PORTFOLIO PROJECTS

POS System

- Developed a real-time desktop application using C# .NET and SQL Server, fully managing inventory, pricing, and sales, with reliable reporting and complete functionality for practical business use.

Static Website

- Built a responsive web page using HTML, CSS, and JavaScript, showcasing layout, navigation, and basic interactivity.

UI Design & Prototype

- Created user interface designs and interactive prototypes using Figma, practicing layout, color schemes, and usability.
